RE: Filing 25-133

Gentleman,

I would kindly ask that you leave the Amateur Radio Rules and Regulations as is.

It is bad enough that the FCC has removed common sense regulations, when it comes to identifying one's station. It used to be that when ID'ing your station, that the station control op and the station being contacted callsigns, HAD to be used. Well, for some silly reason, this rule was removed. Which was, in this operator's opinion, a very poor decision.

Furthermore, there needs to be better regulation on the use of DMR on VHF and UHF. There needs to be a special FCC mandated segment of 145 and 440 MHZ bands for them to operate and out of the normal repeater frequency range. I mean, there is nothing more annoying than having to listen to the horrific noise those bastard digital repeaters put off.

So, in closing, when do not need any rules removed. We need to have some added back and some added to the current rules. Furthermore, we need better enforcement of the rules and all the FCC offices closed, reopened again.

Respectfully,

Charles P. Adkins
